

ARE YOU READY TO HELP SHAPE THE FUTURE OF AUTONOMOUS VEHICLE SAFETY?

How about creating safer roadways, smarter logistics, and more intelligent navigation?

Back-End Web Developer

 **Location:** Anywhere (Remote)

Our mission is to provide the world with the tools to create safer, smarter road markings through connected equipment, automation, and data visualization. Join the Spec-Rite team today to play a key role in continuing Spec-Rite's growth.

Overview:

Spec-Rite is building the next generation of roadway infrastructure technologies. This role will be critical in building and expanding the web applications used in construction and roadway navigation. This position directly provides creative and innovative solutions to real-world problems by building out our industry-leading software platform. Industry advancement and continued company growth rely heavily on quality software development.

Essential Functions:

- Write high-quality, maintainable, extensible, and portable code.
- Design and develop high-quality code to improve platform reliability, availability, and scalability.
- Develop and define the back-end architecture.
- Work with the Project Manager, Senior Software Engineers, and other Software Engineers to develop new features and internal software.
- Assist the support and customer success teams to troubleshoot, debug, and upgrade existing products.
- Participate in code review to ensure a high-quality product for end-users.

Additional Responsibilities Include:

Follow Spec-Rite development guidelines and procedures. This includes, but is not limited to:

- Following Spec-Rite code style and commenting guidelines.
- Using version control and issue tracking software.
- Writing product documentation for customers and/or internal use.
- Protect Spec-Rite intellectual property and proprietary information by keeping code and internal documentation/procedures confidential.
- Assist with internal IT tasks.

Skills & Qualifications:

- Bachelor's Degree in Computer Science or related field.
- 3 + years of back-end Software Engineering experience.
- Strong understanding of Python, Javascript, C++ or related language.
- Strong understanding of SQL, Mongo, Docker, and Git version control systems.
- Experience with cloud services (AWS).
- Familiarity with Agile/Scrum.
- Must be able to work in the U.S.

Experience that will impress us:

- Experience with data analytics and report generation.
- Machine learning and data mining.
- Experience deploying C++-based applications in a scalable cloud environment.

Benefits:

Great benefits are offered including medical, dental and vision insurance, a 401k match, paid training, PTO and paid holidays for work-life balance, and many more benefits.

Salary Range: Competitive and based on your experience.

How to Apply:

- Apply at <https://shawharbor.betterteam.com/>
