

# ARE YOU READY TO HELP SHAPE THE FUTURE OF AUTONOMOUS VEHICLE SAFETY?

How about creating safer roadways, smarter logistics, and more intelligent navigation?

***Front-End Web Developer***

 **Location:** Anywhere (Remote)

Our mission is to provide the world with the tools to create safer, smarter road markings through connected equipment, automation, and data visualization. Join the Spec-Rite team today to play a key role in continuing Spec-Rite's growth.

## **About the Job**

Looking for a company whose mission is to provide the most advanced and accurate real-time pavement markings information? We take project management in the road-way infrastructure industry to another level.

Our mission is to provide the world with the tools to create safer, smarter road markings through connected equipment, automation, and data visualization.

The Front-End Web Developer role is critical for continued company growth at Spec-Rite. This position provides innovative new ideas and adds productivity power to the Engineering department through the development of web applications for data visualization, analysis, and reporting.

This role directly affects the customer relationship with Spec-Rite:

- When software is reliable and performs as expected.
- When software is easy to use.
- When features are properly documented for customer perspective.
- When feature development can be predictably scheduled.
- When products can be modified quickly to meet customer needs.

More than simply accomplishing a list of specific tasks, the company relies on Front-End Web Developers to be creative and to apply research, careful thought, and the Scientific Process to construct not only high-quality final products, but also to suggest improvements to development platforms, procedures, and business processes related to the Engineering department.

## **Essential Functions:**

Required:

- Strong understanding of JavaScript, CSS, and HTML
- Strong knowledge of Web Technologies including HTTP protocol, XML, JSON, REST
- Fluent in React.js or a similar JS framework
- Experience with Version Control Systems (GIT)
- Eye for design and attention to detail
- Self-starter, highly motivated, and capable of working with little or no supervision
- Passionate in software development take ownership and pride in their work

Preferred:

- Experience with Python
- Experience with TypeScript
- Familiarity with Agile/Scrum
- Understand core JavaScript concepts like scope/closures, the event loop, and asynchronous callbacks
- Experience with microservice-based architectures

Experience that will impress us:

- Ability to develop Progressive Web Apps (PWAs), Electron apps, or React Native apps
- Experience with CI/CD pipelines
- Experience with Full-Stack development

## **Responsibilities:**

The principal responsibilities of the Front-End Web Developer are:

- Write maintainable, extensible, portable code
- Work with fellow Front-End Web Developers, Back-End Web Developers, and the balance of the Engineering Team to develop new features and software.
- Assist the support and production teams to troubleshoot, debug, and upgrading existing systems.

Additional responsibilities include:

- Follow Spec-Rite development guidelines and procedures. This includes, but is not limited to:
  - Following Spec-Rite code style and commenting guidelines
  - Using version control and issue tracking software
  - Participating in code review
  - Writing product documentation for customers and/or internal use
  - Deploying final products to the production department
  - Making suggestions to improve the development process
- Provide guidance to Engineering Interns
- Protect Spec-Rite intellectual property and proprietary information by keeping code and internal documentation/procedures confidential
